Heavy Rain, Major Typhoon --- What Do You Do When Hit by Them?

Please Take Evacuation Action According to Information issued by the City

Evacuation preparation

Please get ready so that you can evacuate anytime. Please listen carefully to public information announced by radio, TV and the City. Aged people, people requiring assistance and their supporters who require more time to evacuate should start evacuating immediately.

Evacuation advisories

This situation signifies that there is an extremely strong possibility that a disaster would happen. In principle, please evacuate to the designated evacuation site. Or stay in the building after securing safety.

Evacuation orders

This situation signifies that there is an extremely strong possibility that a disaster would happen, or actually there happened a human victim. All those who are still staying in an unsafe place should evacuate immediately. If you don't have enough time to evacuate, please stay in the building after securing safety.

* In case an unexpected abnormal weather suddenly occurred, there may be a case where an evacuation information from the City does not reach you in time. So, when you get a feeling of any danger, you are requested to evacuate by your own judgement to a safe place such as a house of your family, friend or nearest evacuation site as quickly as possible.
